Numerical Methods: Using MATLAB By George Lindfield, John Penny

Numerical Methods using MATLAB, 3e, is an extensive reference offering hundreds of useful and important numerical algorithms that can be implemented into MATLAB for a graphical interpretation to help researchers analyze a particular outcome. Many worked examples are given together with exercises and solutions to illustrate how numerical methods can be used to study problems that have applications in the biosciences, chaos, optimization, engineering and science across the board.

- Over 500 numerical algorithms, their fundamental principles, and applications
- Graphs are used extensively to clarify the complexity of problems
- Includes coded genetic algorithms
- Includes the Lagrange multiplier method
- User-friendly and written in a conversational style

Editorial Review

From the Back Cover

Covering all the major aspects of numerical methods, this book includes many examples and problems with solutions in MATLAB. Illustrates all the graphics facilities of MATLAB. Provides advanced case studies demonstrating the wide applications of MATLAB. For mathematicians interested in an overview of the applications of MATLAB.

About the Author

George Lindfield is a former lecturer in Mathematics and Computing at the School of Engineering and Applied Science, Aston University in the United Kingdom.

John Penny is an Emeritus Professor of Mechanical Engineering at the School of Engineering and Applied Science, Aston University in the United Kingdom.

Users Review

From reader reviews:

Robert Mundo:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a book. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Numerical Methods: Using MATLAB. Try to stumble through book Numerical Methods: Using MATLAB as your good friend. It means that it can for being your friend when you sense alone and beside those of course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you a lot more confidence because you can know almost everything by the book. So , let's make new experience and knowledge with this book.

Patti Wooden:

The book Numerical Methods: Using MATLAB can give more knowledge and also the precise product information about everything you want. Exactly why must we leave a good thing like a book Numerical Methods: Using MATLAB? Some of you have a different opinion about e-book. But one aim in which book can give many facts for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or info that you take for that, you can give for each other; you may share all of these. Book Numerical Methods: Using MATLAB has simple shape however, you know: it has great and massive function for you. You can look the enormous world by wide open and read a reserve. So it is very wonderful.

Kenneth Jordan:

This Numerical Methods: Using MATLAB is new way for you who has curiosity to look for some information mainly because it relief your hunger details. Getting deeper you onto it getting knowledge more

you know or perhaps you who still having tiny amount of digest in reading this Numerical Methods: Using MATLAB can be the light food in your case because the information inside that book is easy to get through anyone. These books develop itself in the form which is reachable by anyone, yep I mean in the e-book contact form. People who think that in book form make them feel drowsy even dizzy this guide is the answer. So there is not any in reading a book especially this one. You can find actually looking for. It should be here for an individual. So , don't miss the item! Just read this e-book type for your better life and also knowledge.

Ann Ginsberg:

Some individuals said that they feel bored stiff when they reading a guide. They are directly felt the item when they get a half elements of the book. You can choose the book Numerical Methods: Using MATLAB to make your own personal reading is interesting. Your own skill of reading skill is developing when you similar to reading. Try to choose simple book to make you enjoy to learn it and mingle the sensation about book and looking at especially. It is to be initially opinion for you to like to open up a book and study it. Beside that the guide Numerical Methods: Using MATLAB can to be your brand-new friend when you're sense alone and confuse with the information must you're doing of the time.
